BE SAFE - SLEEP WELL WITH SECURITY FOG

Banks around the world are struggling with attacks on ATMs. The criminals are ram raiding the building to drag out the ATM, they are blowing up ATMs with gas or explosives or are physically attacking the ATM with special software to empty it. These attacks cause concern to the public and great damage to the building and ATM. It can be of great cost to the bank to get back in business.

Banks should protect their vault areas, server rooms and back offices where cash is handled with security fog. And even though computers, flat screens, designer furniture etc. are no longer the preferred targets in banks, they still attract criminals.

PROTECT has solved these problems. The fog cannon simply “blinds” the criminals in seconds.
