

# A FOG CANNON FROM PROTECT

secures your valuables in seconds and makes  
it impossible for the burglar to steal anything!

SECURED IN SECONDS

# EXPERTS IN SECURITY FOG

PROTECT is the world's largest manufacturer of fog cannons, for protection against burglary, robbery and vandalism. We are also the fastest growing company in the industry.

We have reached this position, because we are innovative and create added value for our customers, amongst other things.

At PROTECT, innovation is in our DNA. We strive to offer our customers the best and most valuable security systems on the market.

We are sometimes referred to as the Mercedes of the security fog industry, because our solutions are not always the cheapest, but are always the best!

As the sole manufacturer of fog cannons, we provide authentic documentation as to our claims. Our products comply with the global IEC 62642-8 standard and are certified by authorities all over the world. At the same time, our products come together with up to 5 years warranty because we have confidence in our quality.

Our fog cannons can be used in any premises, from large warehouses to private homes, and they leave no trace or smell.

That is why since the beginning of 2001, 80,000 PROTECT Fog Cannons have been installed world-wide.

Our products are sold in over 50 countries on 6 continents and we are not planning to slow down.

## Facts:

- Two times receiver of the Børsens Gazelle Award (Danish growth prize)
- Security Company of the Year in Denmark 2011

# WE SECURE YOUR VALUABLES IN SECONDS

A burglar breaks through a window and triggers a sensor. Both the alarm system and the fog cannon are activated and the room is filled with a white, dense, dry fog, so the burglar can't even see his hand in front of his face! He does the only thing he can - turns around and runs out the same way he came in.

A fog cannon is a generator that uses a heater to convert harmless fluid into waves of artificial fog which is disorientating. This all happens within a few seconds!

The fog is as thick and harmless as the "smoke effect" at concerts and theatres.

The fog can remain in a room for up to one hour. If the burglar tries to come back, the fog will discharge again!

PROTECT Fog Cannons are designed to fit most premises. They can be mounted overtly or as an elegant covert solution.

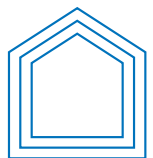

Security fog is an active solution, and within seconds it makes the burglar change his mind.

Recover faster and more painlessly after a burglary. The system is cheaper than most think. Some insurance companies give a discount on the premium.

PROTECT operates in over 50 countries, you can count on fast delivery, a contact hotline and excellent service. We have many satisfied customers all over the world.

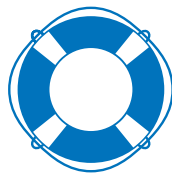

We have 6 different fog cannon models that suit different room sizes. Additionally, they can be installed to your specific requirements.

Security fog works against burglaries, robberies and vandalism. The fog can be discharged automatically via sensors, manually with a "panic button" or remotely from a control centre.

Upon registration through our website, we offer up to 5 years warranty on our fog cannons. We can do this because we are confident about our high quality.

We have our own research and development, and production departments, and our technical hotlines are staffed by experts in security fog. Our customers appreciate our support in everything we do!

We offer courses and e-learning for product training, technical issues, assembly and servicing. This ensures high quality installations for our users.

# A STRONG BUSINESS CONCEPT

Security fog from PROTECT is currently sold in more than 50 countries across the world - and the number is rising.

Our products are sold through partners/distributors and alarm installers to end-customers. We know that alarm installers have the closest contact with companies or homeowners who need a security solution such as this.

Our business model is the most reliable in the industry. We offer total support in sales, technical service and marketing, and excellent value for money.

PROTECT Fog Cannons and fluids are tested and approved by independent testing laboratories throughout the world.

Every day we, together with our partners/distributors are working with small and large alarm com-

panies. Some of the most famous are G4S, Stanley Security, ADT, Chubb, Securitas and Nokas.

We also have good co-operation with the police, fire service and insurance companies, who strongly recommend our highly effective and harmless security solution.

# OUR CUSTOMERS ARE HAPPY CUSTOMERS

## BUSINESS

Our solutions are not limited to a specific customer group. The vast majority of our fog cannons can be found in banks, supermarkets, shops, educational establishments, warehouses, petrol stations and offices. No room is too large or too small.

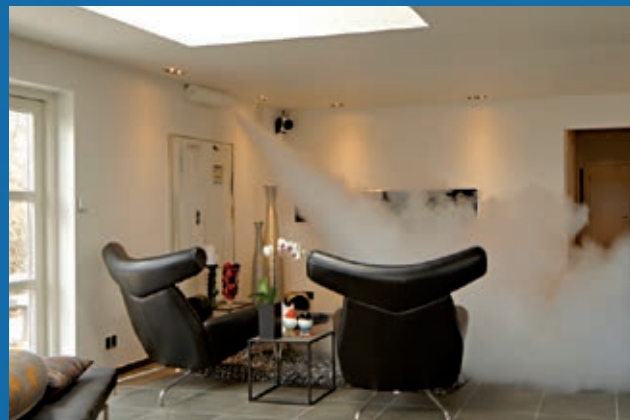

We provide solutions that give peace of mind. And with connection to the internet, you can even keep up with the status on your phone, so you always know that your fog installation is “ready for the fight”.

## PRIVATE

Also, security fog for private users is an effective protection for art, jewellery, furniture, cash, hi-fi, cars, guns and much more. There is nothing worse than losing irreplaceable items.

Particularly private and exclusive stores and offices choose hidden installation behind the wall or ceiling. An elegant solution that works as an extra surprise for the burglar.
